REMOTE ONLINE NOTARIZATION (RON)

We now offer remote online notarization (RON) through the following state approved platforms: Pavaso, E-mortgage Law, Nexsys, Notarize and NotaryCam.

The approved platforms allow your clients to sign virtually while still incorporating e-notary authentication steps.

Essentially, each party involved will meet virtually via a secured platform. Identities will be verified and an e-notary will witness and verify the required paperwork that is signed to complete the closing. The signing will be recorded for proof of closing and a copy of the completed paperwork will be immediately sent out when the closing is finished.

WHY RON NOW?

RON under Michigan “law” may be performed utilizing two-way real-time audiovisual technology.

For everyone’s convenience and safety your clients can now sign virtually anywhere.

THE PROCESS OF RON UTILIZING ONE OF THE 5 PLATFORMS*

You will need a computer with a strong **internet** connection, a **camera** and a **microphone**, a way to provide an e-signature (**mouse, drawing pad, etc**), and a **government issued ID**. You should feel comfortable with your ability to resolve any computer issues that may occur during the closing.

1. Signers will receive an email utilizing one of the five platforms with the docs to be notarized.

2. Signers will review all documents within the platform and ask any questions if needed.

3. Signers then verify their identities and meet with a notary in one of the five video approved platforms.

4. Copies of documents are sent out immediately after closing.

* Procedures vary between all platforms. Appropriate instructions will be given with the chosen platform. Subject to Lender approval.
